

## Shims

### MATERIAL

Hardening and tempering steel or casehardening steel

### THICKNESS

from 0,8 mm to 5,00 mm

### MACHINING

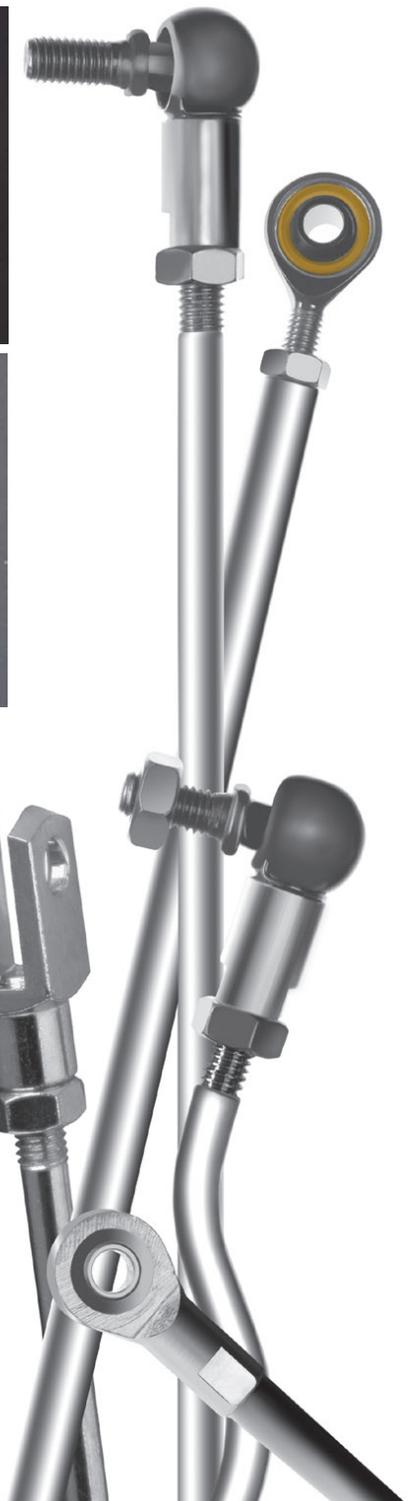

Blanking, turning, heat treatments, grinding, polishing...

Thickness tolerances up to  $\pm 0,01$  mm

Special identification of the components by paint or laser mark available

Our specialization consists in realizing products taken from the client drawings, that need blanking, turning, heat treatments, grinding, polishing, eventual laser mark and/or paint job for recognition of job.

## Rod assemblies and special components

In special production, you can get the desired product, thanks to the specialisation of qualified personnel. This consists in making products to design, which require blanking, milling, heat treatment, grinding, polishing, eventually marking and assembly.

**SPECIAL PRODUCTS AND ACCORDING TO DRAWINGS**
