

V-BELTS RAW EDGE COGGED

V-BELTS RAW EDGE COGGED

Description

Energy saving, higher performance thanks to their flexibility. Dunlop raw edged cogged belts with a higher performance level, have a longer service life. Special designs with raw edges that allow higher slipping resistance even when they are working with low installation tensions.

Maximum resistance to the action of heat and oils. High antistatic properties conforming to ISO1813.

Part numbers are identified by 2 letters (e.g. AX) the belts cross section and a 2 or 3 digit number (e.g. 50) which represents the belts length in inches. AX50 etc.
