

APOLLO GLOBAL COUPLINGS

Quick-release coupling series

Features and Benefits

- Increase productivity
- High quality
- Easy to use
- Contributes in work-site safety
- Automatic gas supply shutoff
- Double seal packing
- Miss-connection proof
- Designed according to ISO 7289

The Apollo Global couplings are designed to provide a quick set up and removal of cutting and welding equipment. A precisely machined single push system easily connects matching couplings with a click. The safety lock function ensures a secure connection and prevents unintended disconnection during operation. KOIKE Apollo Global couplings are designed according to ISO 7289.

Quick couplings

Technical specifications

■ Maximum working pressure

Oxygen 9.8 bar 2.0 bar Fuel gas Inert gas (Welding gas) 9.8 bar

Check valve working pressure (Z-type coupling only)

0.015 bar Activation at

Durability

Endurance test (by UL) 30,000 cycles

High quality design

Brightly colored

For safety, each coupling socket has lock key made of brightly colored resin. Unlike sticker or paint, color is permanent, contributing in safety.

Safety lock mechanism

Each socket is equipped with Safety Lock function, which secures the connection and prevents accidental misconnection.

Automatic gas supply shutoff

This allows the flow of supply gas only when couplings are connected. Gas supply is automatically shutoff when couplings are disconnected.

Double seal packing

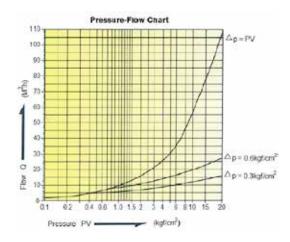

The double seal packings between the plug and the socket assures tight sealing.

Chrome plated

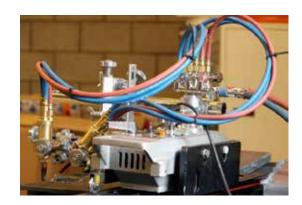

Durable chrome plating finish provide corrosion resistance and ensures smooth coupling to last.

Quality

Designed according to ISO 7289 and produced in Japan under strict quality management.

Series

S: "Global" Coupling series

Flashback arrestor

A: Equipped

Gas type

2: Fuel gas 3: Inert gas (welding gas) 1: Oxygen

Connector shape

P : Plug S: Socket

Equipped to

G: Regulator A: Hose O: Machine/Torch

Check valve (back-flow protection)

Z: Equipped
