

LOCKOUT STATIONS

The OSHA standard for The Control of Hazardous Energy (Lockout/Tagout): Title 29 (CFR) Part 1910.147

Lockout stations are equipped with the tools you need to isolate mechanical and electrical control points. These stations are portable or static and work for just about any application.

Lockout Stations are hard-wearing, user-friendly wall stations that offer the ultimate storage space for large facilities and for multiple departmental use. Lockout/Tagout stations are used to store Lockout Tagout equipment securely and in one place. Most of the lockout stations are wall mountable and allow you to secure the board in a fixed position near the energy source so that Lockout Tagout equipment is always ready and at hand.

Our **Lockout Stations** come in various sizes and shapes and hold everything from hasps to padlocks.
