Contents .....	4	Wear resistance .....	34
Foreword .....	9	Operating temperatures .....	35
Catalogue overview .....	11	Chemical resistance .....	36
Important product updates .....	12	Storage and handling of seals .....	47
How to use .....	13	General .....	47
		Storage .....	47
		Cleaning and maintenance .....	47
		Seal failure analysis .....	48
		Leaking seals are not inevitable .....	48
		Consider the fishbone .....	48
		Excessive wear .....	50
		Nicks, scratches, or cuts in lip contact area .....	50
		Crosslink carbonization .....	51
		Axial cracking on NBR lip contact area .....	51
		Inverted sealing lip .....	52
		Seal damaged during installation .....	52
		Irregular / damaged shaft surface finish .....	53
		Paint overspray on sealing lip or contamination .....	53
		FEA simulation in SKF .....	54
		A brief history of FEA .....	54
		FEA Simulation .....	55
		Machined seals concept (MSC) .....	56
		Manufacturing flexibility .....	56
		Meeting unique sealing demands, on-demand .....	56
		Application engineering support .....	56
		Profile and materials selection .....	56
		CNC manufacturing process .....	56
		Rapid delivery worldwide .....	56
		Manufacturing flexibility .....	56
		Meeting unique sealing demands, on-demand .....	56
