Text index

A	markings 145, 194 matched sets 141–144
	mounted with spacer rings 166-172, 192-193
A	mounting 123, 136, 145, 194
angular contact ball bearings 197	oil nozzle positions 118, 199–261
axial-radial cylindrical roller bearings 333	ordering possibilities 141
double direction angular contact thrust ball bearings 303, 311	preload 50, 69, 90-93, 151-172
thrust bearings for screw drives 342, 364–365	product table 198–261
AC 130, 196	reference grease quantities 102, 199–261
ACB 196	relubrication intervals 106–109
accuracy of boarings 2/ 2F	reuse 124
of bearings 24–25	sealed bearings 136, 192
of seats and abutments 75–77, 325–326 of seats and abutments (for screw drives) 349	speeds 28–29, 38–40, 42, 192–193
tolerance symbol definitions 48–49	spring-loaded 64, 90, 93, 165, 190 stiffness 67–69, 173–182
ACD 196	temperature limits 136
ACE 196	temperature rise as a function of speed 38
acrylonitrile-butadiene rubber (NBR) 56	tolerance classes and tolerances 24, 146–150
adapter sleeves 376	
adjusting	universally matchable bearings 141–144, 194 with NitroMax steel rings 52–53, 141
angular contact ball bearings 166–172, 192	angular contact thrust ball bearings
cylindrical roller bearings 278–279, 280–283, 392	cartridge units (for screw drives) 342–343, 372–373
precision lock nuts 380–381	designs and variants 21–22
ageing 55–56, 101, 114, 125	double direction bearings 301–317
air flow	double direction bearings 301–317 double direction bearings (for screw drives) 341, 368–371
effect on relubrication interval 109	single direction bearings (for screw drives) 341, 366–371
in an external sealing arrangement 96	angularity 76
in an oil-air lubrication system 121	anhydrous hydrofluorides 56
aluminium thickeners 110	annular grooves
ambient temperature	in angular contact ball bearings 120, 136–140
considerations when selecting a grease 99	in cylindrical roller bearings 266
effect on bearing speed capability 39	in double direction angular contact thrust ball bearings
angular contact ball bearings 127-261	303–304
adjustment during mounting 166-172, 192	in shafts 96-97
applications 58-64, 131-132	in thrust bearings for screw drives 341
assortment 128–129	applications
axial displacement 31, 69, 91, 166	for angular contact ball bearings 58-64, 131-132
bearing arrangements 141–144	for axial-radial cylindrical roller bearings 320
cages 134–135	for cylindrical roller bearings 57-59, 62
contact angles 130–131	for double direction angular contact thrust ball bearings 57
designation system 196–197	59
designs and variants 21, 128–141	for thrust bearings for screw drives 350-351
dimension series 27, 129, 130	machine tools 57–64
dimension standards 146	associated components 20
direct oil-air lubrication variants 120, 136-140	accuracy of seats and abutments 75–77, 325–326
dismounting 124	accuracy of seats and abutments (for screw drives) 349
equivalent bearing loads 190–191	provisions for mounting and dismounting 88–89
fits 71–74	attachment bolts
fitting and clamping bearing rings 183–189	for axial-radial cylindrical roller bearings 330-332, 335
high-capacity bearings 129, 131	for thrust bearings for screw drives 371, 373
high-speed design bearings 129, 132	attainable speeds 28, 44
hybrid bearings 133, 141, 167, 198–261	with grease lubrication 42–43, 45
initial grease fill 101–102, 105	with oil lubrication 40–41, 45
lifting forces 91–92	axial clamping forces 184, 186–188
load carrying capacity 30, 189	axial displacement
location 183–189	considerations when selecting a bearing 31
lubrication (grease) 99–112, 136, 192 Jubrication (oil) 113–122, 136–140, 192	considerations when selecting a fit 70, 72 in angular contact hall bearings, 31, 69, 91, 166
IUDI ICALION (OII) 113-122, 130-140, 172	in angular contact ball bear MGS 31, 69, 91, 166

Note: Designation prefixes and suffixes are shown in **bold**.

in cylindrical roller bearings 31, 264, 269, 280	boat gyrostabilizers 131
axial drive-up 278-279, 280, 284 axial fitting forces 184, 186-188	bolt mounting with cartridge units (for screw drives) 342–343, 372–373
axial location 78–87	with double direction bearings (for screw drives) 341,
with precision lock nuts 78, 375–389	370–371
with stepped sleeves 79, 80–87	bolts
axial locking screws 377, 378, 381	attachment bolts 330-332, 335, 371, 373
axial preload	retaining bolts 330, 335
in angular contact ball bearings 151–172	bore gauges 282, 401
in axial-radial cylindrical roller bearings 322–323 in double direction angular contact thrust ball bearings 308	boring machines 131 brass
in thrust bearings for screw drives 355–357, 358	cages in angular contact ball bearings 134–135
axial stiffness	cages in cylindrical roller bearings 265, 267
of angular contact ball bearings 173–182	cages in double direction angular contact thrust ball bearings
of axial-radial cylindrical roller bearings 322–323	304–305
of cylindrical roller bearings 275–276	material properties 55
of double direction angular contact thrust ball bearings 309 of thrust bearings for screw drives 339, 356–359	
of typical spindle bearing systems 67	C
axial-radial cylindrical roller bearings 319–335	C
applications 320	
associated components 324–326, 330	C
attachment bolts 330–332, 335	angular contact ball bearings 130, 196–197
bearing damage 322	double direction angular contact thrust ball bearings 311
cages 320 designation system 333	thrust bearings for screw drives 364 C2 273, 286
designs and variants 22, 320	C2 273, 286 C3 273, 286
dimension standards 321	cages
equivalent bearing loads 327	function 23
fits 324–326	in angular contact ball bearings 134–135
friction 322–323, 330	in axial-radial cylindrical roller bearings 320
load carrying capacity 30, 322, 327, 328–329	in cylindrical roller bearings 264, 267, 268, 280
lubrication 320, 324	in double direction angular contact thrust ball bearings
mounting 330–332 preload 322–323,324	304–305 in thrust bearings for screw drives 344
product table 334–335	materials 51, 55
retaining bolts 330, 335	calcium thickeners
running-in 324	compatibility 110
stiffness 322–323	considerations when selecting a grease 99–100
storage 330	car wheels → racing car wheels
temperature limits 324 tightening torques 332	carbon fibre reinforced cages 55 in angular contact ball bearings 134–135
tolerance classes and tolerances 24, 321	in cylindrical roller bearings 264, 267
transport 330	cartridge units 342-343, 372-373
unloading forces 322-323	applications 350-351
	compared to other bearings for screw drives 339
	designation system 364–365
В	designs and variants 22, 342–343 dimension standards 353
	frictional moment 359–360
В	location 342
angular contact ball bearings 196–197	preload 355
axial-radial cylindrical roller bearings 333	product table 372–373
cylindrical roller bearings 286	sealing solutions 344-345
double direction angular contact thrust ball bearings 303, 311 thrust bearings for screw drives 365	speeds 344,363 stiffness 358–359
back-to-back arrangements	surface treatment 342
with angular contact ball bearings 142–144	temperature limits 344-345
with double direction angular contact thrust ball bearings 303	tolerance classes and tolerances 353–354
with thrust bearings for screw drives 341, 342-343,	CB 196
346–348	CD 196
ball screw support bearings → thrust bearings for screw drives	CE 196
barium thickeners 110 base oil viscosity → viscosity	centrifugal forces in angular contact ball bearings 132, 162, 166, 167
basic dynamic load rating 33	in hybrid bearings 34, 37
basic rating life 34	ceramics 54
basic static load rating 36	chamfer dimensions 46-47
bearing damage	maximum chamfer dimension limits 47, 50
contamination 124	tolerance symbol definitions 48
creep 70	churning 111, 113
false brinelling 100 fracture 52	circulating oil 113, 114, 121 clay 110
skid smearing 133, 268, 304, 322	clearance
bearing systems 57	in housing seats 30, 74, 302
black-oxide 342	internal clearance 50-51
blue dye 393	CN 273, 286

hybrid bearings	L 120, 137–140, 197
angular contact ball bearings 133, 141, 167, 198–261	L1 120, 139, 197

Note: Designation prefixes and suffixes are shown in **bold**.

labyrinth seals	of thrust bearings for screw drives 340, 346–348
in a multi-stage sealing arrangement 96-97	materials 51–56
integral to stepped sleeves 80, 84	for bearings 51–54
laminar rings 339, 344–345	for cages 55
lathes 57–58, 131, 166	for precision lock nuts 378
life 33–35	for seals 56
lifting forces	measuring systems 131
for angular contact ball bearings 91–92	medical equipment 131
for double direction angular contact thrust ball bearings 94	metal cutting machines 57–63, 132
for thrust bearings for screw drives 94, 360	metal-to-metal contact 113
linear springs → springs lithium thickeners	microturbines 131
compatibility 110	milling machines 59, 62-63, 131-132, 141, 166 mineral acids 56
considerations when selecting a grease 99–100 in sealed bearings 104	mineral oils 56, 99 compatibility 109
	minimum load 34
live centres 59, 131	minimum quantity lubrication (MQL)
loads considerations when selecting a bearing 30	with oil-air lubrication 116
effect on relubrication interval 109	with SKF Mircrodosage system 121
load ratings 33–36	misalignment 75
requisite minimum loads 34	in thrust bearings for screw drives 346
locating/non-locating bearing systems 31	miscibility 109–110
location	modulus of elasticity 54
axial 78-87	moisture
radial 70–77	effect on lubricant properties 122
with precision lock nuts 376–377	effect on relubrication interval 109
with stepped sleeves 79, 80–87	protection prior to / during mounting 123
lock nuts → precision lock nuts	protection with grease 99
lock washers 376	protection with seals 95
locking pins 376	moment loads
loose fits 71	on angular contact ball bearings 142, 167
effect on stiffness 31, 68	on axial-radial cylindrical roller bearings 327, 328–329
for non-locating bearings 31	on thrust bearings for screw drives 346
radial location 70	moment stiffness 323
loosening torques 378	motorized spindles → electro-spindles
lubricants	mounting 123-124
greases 99–101, 104, 110	angular contact ball bearings 136, 145, 194
oils 121	axial-radial cylindrical roller bearings 330-332
storage 122	cylindrical roller bearings 280–285
lubricating oils → oils	design considerations 88–89
lubricating oils → oils	design considerations 88–89 double direction angular contact thrust ball bearings 305, 310 precision lock nuts 379–381
lubricating oils → oils lubrication	design considerations 88–89 double direction angular contact thrust ball bearings 305, 310 precision lock nuts 379–381 stepped sleeves 86–87
lubricating oils → oils lubrication grease 99–112	design considerations 88–89 double direction angular contact thrust ball bearings 305, 310 precision lock nuts 379–381
lubricating oils → oils lubrication grease 99–112 oil 113–122 lubrication holes in angular contact ball bearings 120, 136–140	design considerations 88–89 double direction angular contact thrust ball bearings 305, 310 precision lock nuts 379–381 stepped sleeves 86–87 thrust bearings for screw drives 339, 345, 352, 362 mounting fluids 87
lubricating oils → oils lubrication grease 99–112 oil 113–122 lubrication holes	design considerations 88–89 double direction angular contact thrust ball bearings 305, 310 precision lock nuts 379–381 stepped sleeves 86–87 thrust bearings for screw drives 339, 345, 352, 362
lubricating oils → oils lubrication grease 99–112 oil 113–122 lubrication holes in angular contact ball bearings 120, 136–140	design considerations 88–89 double direction angular contact thrust ball bearings 305, 310 precision lock nuts 379–381 stepped sleeves 86–87 thrust bearings for screw drives 339, 345, 352, 362 mounting fluids 87
lubricating oils → oils lubrication grease 99–112 oil 113–122 lubrication holes in angular contact ball bearings 120, 136–140 in axial-radial cylindrical roller bearings 324	design considerations 88–89 double direction angular contact thrust ball bearings 305, 310 precision lock nuts 379–381 stepped sleeves 86–87 thrust bearings for screw drives 339, 345, 352, 362 mounting fluids 87
lubricating oils → oils lubrication grease 99–112 oil 113–122 lubrication holes in angular contact ball bearings 120, 136–140 in axial-radial cylindrical roller bearings 324 in cylindrical roller bearings 266 in double direction angular contact thrust ball bearings 304 in thrust bearings for screw drives 341	design considerations 88–89 double direction angular contact thrust ball bearings 305, 310 precision lock nuts 379–381 stepped sleeves 86–87 thrust bearings for screw drives 339, 345, 352, 362 mounting fluids 87 multi-spindle heads 320
lubricating oils → oils lubrication grease 99–112 oil 113–122 lubrication holes in angular contact ball bearings 120, 136–140 in axial-radial cylindrical roller bearings 324 in cylindrical roller bearings 266 in double direction angular contact thrust ball bearings 304	design considerations 88–89 double direction angular contact thrust ball bearings 305, 310 precision lock nuts 379–381 stepped sleeves 86–87 thrust bearings for screw drives 339, 345, 352, 362 mounting fluids 87
lubricating oils → oils lubrication grease 99–112 oil 113–122 lubrication holes in angular contact ball bearings 120, 136–140 in axial-radial cylindrical roller bearings 324 in cylindrical roller bearings 266 in double direction angular contact thrust ball bearings 304 in thrust bearings for screw drives 341	design considerations 88–89 double direction angular contact thrust ball bearings 305, 310 precision lock nuts 379–381 stepped sleeves 86–87 thrust bearings for screw drives 339, 345, 352, 362 mounting fluids 87 multi-spindle heads 320
lubricating oils → oils lubrication grease 99–112 oil 113–122 lubrication holes in angular contact ball bearings 120, 136–140 in axial-radial cylindrical roller bearings 324 in cylindrical roller bearings 266 in double direction angular contact thrust ball bearings 304 in thrust bearings for screw drives 341	design considerations 88–89 double direction angular contact thrust ball bearings 305, 310 precision lock nuts 379–381 stepped sleeves 86–87 thrust bearings for screw drives 339, 345, 352, 362 mounting fluids 87 multi-spindle heads 320 N NBR → acrylonitrile-butadiene rubber (NBR)
lubricating oils → oils lubrication grease 99–112 oil 113–122 lubrication holes in angular contact ball bearings 120, 136–140 in axial-radial cylindrical roller bearings 324 in cylindrical roller bearings 266 in double direction angular contact thrust ball bearings 304 in thrust bearings for screw drives 341 lubrication intervals 117	design considerations 88–89 double direction angular contact thrust ball bearings 305, 310 precision lock nuts 379–381 stepped sleeves 86–87 thrust bearings for screw drives 339, 345, 352, 362 mounting fluids 87 multi-spindle heads 320 N NBR → acrylonitrile-butadiene rubber (NBR) needle roller bearings 347
lubricating oils → oils lubrication grease 99–112 oil 113–122 lubrication holes in angular contact ball bearings 120, 136–140 in axial-radial cylindrical roller bearings 324 in cylindrical roller bearings 266 in double direction angular contact thrust ball bearings 304 in thrust bearings for screw drives 341	design considerations 88–89 double direction angular contact thrust ball bearings 305, 310 precision lock nuts 379–381 stepped sleeves 86–87 thrust bearings for screw drives 339, 345, 352, 362 mounting fluids 87 multi-spindle heads 320 N NBR → acrylonitrile-butadiene rubber (NBR) needle roller bearings 347 NitroMax steel 52–53
lubricating oils → oils lubrication grease 99–112 oil 113–122 lubrication holes in angular contact ball bearings 120, 136–140 in axial-radial cylindrical roller bearings 324 in cylindrical roller bearings 266 in double direction angular contact thrust ball bearings 304 in thrust bearings for screw drives 341 lubrication intervals 117	design considerations 88–89 double direction angular contact thrust ball bearings 305, 310 precision lock nuts 379–381 stepped sleeves 86–87 thrust bearings for screw drives 339, 345, 352, 362 mounting fluids 87 multi-spindle heads 320 N NBR → acrylonitrile-butadiene rubber (NBR) needle roller bearings 347 NitroMax steel 52–53 in hybrid angular contact ball bearings 141
lubricating oils → oils lubrication grease 99–112 oil 113–122 lubrication holes in angular contact ball bearings 120, 136–140 in axial-radial cylindrical roller bearings 324 in cylindrical roller bearings 266 in double direction angular contact thrust ball bearings 304 in thrust bearings for screw drives 341 lubrication intervals 117	design considerations 88–89 double direction angular contact thrust ball bearings 305, 310 precision lock nuts 379–381 stepped sleeves 86–87 thrust bearings for screw drives 339, 345, 352, 362 mounting fluids 87 multi-spindle heads 320 N NBR → acrylonitrile-butadiene rubber (NBR) needle roller bearings 347 NitroMax steel 52–53 in hybrid angular contact ball bearings 141 NLGI consistency grades 99
lubricating oils → oils lubrication grease 99–112 oil 113–122 lubrication holes in angular contact ball bearings 120, 136–140 in axial-radial cylindrical roller bearings 324 in cylindrical roller bearings 266 in double direction angular contact thrust ball bearings 304 in thrust bearings for screw drives 341 lubrication intervals 117 M M angular contact ball bearings 197	design considerations 88–89 double direction angular contact thrust ball bearings 305, 310 precision lock nuts 379–381 stepped sleeves 86–87 thrust bearings for screw drives 339, 345, 352, 362 mounting fluids 87 multi-spindle heads 320 N NBR → acrylonitrile-butadiene rubber (NBR) needle roller bearings 347 NitroMax steel 52–53 in hybrid angular contact ball bearings 141 NLGI consistency grades 99 non-contact seals
lubricating oils → oils lubrication grease 99–112 oil 113–122 lubrication holes in angular contact ball bearings 120, 136–140 in axial-radial cylindrical roller bearings 324 in cylindrical roller bearings 266 in double direction angular contact thrust ball bearings 304 in thrust bearings for screw drives 341 lubrication intervals 117 M M angular contact ball bearings 197 double direction angular contact thrust ball bearings 304–	design considerations 88–89 double direction angular contact thrust ball bearings 305, 310 precision lock nuts 379–381 stepped sleeves 86–87 thrust bearings for screw drives 339, 345, 352, 362 mounting fluids 87 multi-spindle heads 320 N NBR → acrylonitrile-butadiene rubber (NBR) needle roller bearings 347 NitroMax steel 52–53 in hybrid angular contact ball bearings 141 NLGI consistency grades 99 non-contact seals in angular contact ball bearings 32, 136
lubricating oils → oils lubrication grease 99–112 oil 113–122 lubrication holes in angular contact ball bearings 120, 136–140 in axial-radial cylindrical roller bearings 324 in cylindrical roller bearings 266 in double direction angular contact thrust ball bearings 304 in thrust bearings for screw drives 341 lubrication intervals 117 M M angular contact ball bearings 197 double direction angular contact thrust ball bearings 304– 305, 311	design considerations 88–89 double direction angular contact thrust ball bearings 305, 310 precision lock nuts 379–381 stepped sleeves 86–87 thrust bearings for screw drives 339, 345, 352, 362 mounting fluids 87 multi-spindle heads 320 N NBR → acrylonitrile-butadiene rubber (NBR) needle roller bearings 347 NitroMax steel 52–53 in hybrid angular contact ball bearings 141 NLGI consistency grades 99 non-contact seals in angular contact ball bearings 32, 136 in external sealing arrangements 96–97
lubricating oils → oils lubrication grease 99–112 oil 113–122 lubrication holes in angular contact ball bearings 120, 136–140 in axial-radial cylindrical roller bearings 324 in cylindrical roller bearings 266 in double direction angular contact thrust ball bearings 304 in thrust bearings for screw drives 341 lubrication intervals 117 M M angular contact ball bearings 197 double direction angular contact thrust ball bearings 304– 305, 311 MA 134, 196	design considerations 88–89 double direction angular contact thrust ball bearings 305, 310 precision lock nuts 379–381 stepped sleeves 86–87 thrust bearings for screw drives 339, 345, 352, 362 mounting fluids 87 multi-spindle heads 320 N NBR → acrylonitrile-butadiene rubber (NBR) needle roller bearings 347 NitroMax steel 52–53 in hybrid angular contact ball bearings 141 NLGI consistency grades 99 non-contact seals in angular contact ball bearings 32, 136
lubricating oils → oils lubrication grease 99–112 oil 113–122 lubrication holes in angular contact ball bearings 120, 136–140 in axial-radial cylindrical roller bearings 324 in cylindrical roller bearings 266 in double direction angular contact thrust ball bearings 304 in thrust bearings for screw drives 341 lubrication intervals 117 M M angular contact ball bearings 197 double direction angular contact thrust ball bearings 304– 305, 311 MA 134, 196 machine tool spindles → spindles	design considerations 88–89 double direction angular contact thrust ball bearings 305, 310 precision lock nuts 379–381 stepped sleeves 86–87 thrust bearings for screw drives 339, 345, 352, 362 mounting fluids 87 multi-spindle heads 320 N NBR → acrylonitrile-butadiene rubber (NBR) needle roller bearings 347 NitroMax steel 52–53 in hybrid angular contact ball bearings 141 NLGI consistency grades 99 non-contact seals in angular contact ball bearings 32, 136 in external sealing arrangements 96–97
lubricating oils → oils lubrication grease 99–112 oil 113–122 lubrication holes in angular contact ball bearings 120, 136–140 in axial-radial cylindrical roller bearings 324 in cylindrical roller bearings 266 in double direction angular contact thrust ball bearings 304 in thrust bearings for screw drives 341 lubrication intervals 117 M M angular contact ball bearings 197 double direction angular contact thrust ball bearings 304– 305, 311 MA 134, 196 machine tool spindles → spindles machine tools	design considerations 88–89 double direction angular contact thrust ball bearings 305, 310 precision lock nuts 379–381 stepped sleeves 86–87 thrust bearings for screw drives 339, 345, 352, 362 mounting fluids 87 multi-spindle heads 320 N NBR → acrylonitrile-butadiene rubber (NBR) needle roller bearings 347 NitroMax steel 52–53 in hybrid angular contact ball bearings 141 NLGI consistency grades 99 non-contact seals in angular contact ball bearings 32, 136 in external sealing arrangements 96–97 in thrust bearings for screw drives 32, 344–345
