Isolation valves, drain traps and ancillaries

TI-P148-04 CMGT Issue 10

CA46 and CA46S **Austenitic Stainless Steel** Air and Gas Traps Flanged DN15 to DN25

Description

The CA46 is an austenitic stainless steel ball float air and gas trap. It is available with a soft valve cone given designation CA46 or with a metal valve cone given designation CA46S both having horizontal flanged connections. The cover will be drilled and tapped 1/2" BSP or NPT for the purpose of fitting a balance line. Body and cover castings are produced by a TÜV approved foundry.

Standards

This product fully complies with the requirements of the Pressure Equipment Directive (PED) and carries the C mark when so required.

Certification

The product is available with material certification to EN 10204 3.1.

Note: All certification/inspection requirements must be stated at the time of order placement.

Sizes and pipe connections

CA46 - DN15 and DN20 CA46S - DN15, DN20 and DN25

Standard flanges are:

- EN 1092 PN40 with DIN face-to-face dimensions.
- ASME 150, ASME 300 and JIS/KS 20 flanges are provided with drilled and tapped bolt holes with DIN face-to-face dimensions.

Balance line - PN flanges will be provided with BSP balance line and ASME and JIS/KS 20 flanges with NPT balance line.

Compressed air products

Isolation valves, drain traps and ancillaries

Pressure/temperature limits

CA46 - DN15 and DN20 flanged

CA46S - DN15, DN20 and DN25 flanged

The product **must not** be used in this region.

- A B Flanged EN 1092 PN40 and ASME 300.
- A C Flanged ASME 150 and JIS/KS 20K.

Safety information, installation and maintenance

For full details see the Installation and Maintenance Instructions (IM-P148-37) supplied with this product.

Installation note:

The trap should be fitted in the horizontal plane below what it is draining, with the direction of flow as indicated on the body so that the float mechanism is free to rise and fall in a vertical plane.

One of the advantages of the float trap for draining air and gas systems is that no bleed is required for satisfactory operation. However, because the trap has no bleed a separate balance line is needed to prevent it becoming air or gas locked.

Make sure that the balance line is piped back to the upstream side.

A balance line is essential for the correct operation of this product.

For convenience of maintenance it is recommended that a union is fitted in the balance line near to the trap cover.

Disposal:

The product is recyclable. No ecological hazard is anticipated with the disposal of this product providing due care is taken.

How to order

Example: 1 off Spirax Sarco DN25 CA46S-32 air and gas trap flanged to EN 1092 PN40 with austenitic stainless steel body and cover.

Spare parts

The spare parts available are shown in solid outline. Parts drawn in a grey line are not supplied as spares.

Available spare

Soft valve cone CA46	(packet of 3)	9
Made and a second broads floor	CA46	5, 6, 7, 8, 9, 14, 15, 16
Main valve assembly with float	CA46S	5, 6, 7, 8 + 9, 14, 15, 16
Complete set of gaskets	(packet of 3 sets)	3, 6

How to order spares

Always order spares by using the description given in the column headed 'Available spares' and state the size and type of trap. Example: 1 - Main valve assembly for a Spirax Sarco DN25 CA46S-32 air and gas trap.
