M21Fi ISO

Reduced Bore Firesafe API607 Ball Valve DN15 to DN150 Flanged PN40

Description

The M21Fi is a reduced bore ball valve, with a single piece body, having ISO mounting as standard. It is designed to be an isolating valve, which can be used with the majority of industrial fluids, not a control valve.

Firesafe design

In normal working conditions, the ball rests against two PDR 0.8 seats ensuring total closure. When the valve is submitted to temperature above the limits the seats can withstand, the seat becomes deformed and renders to extrusion. When the seats have been totally destroyed, the ball will come to rest firmly against the metal seat in the cap, producing a metal-to-metal closing. This secondary seat in the valve cap ensures the valve will operate to international API 607 standard.

Available types

M21Fi2 ISO	Zinc plated carbon steel body, PDR 0.8 seats.
M21Fi3 ISO	Stainless steel body, PDR 0.8 seats.

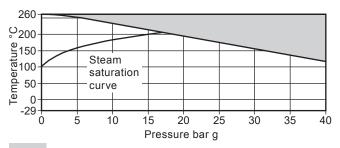

Standards

This product fully complies with the requirements of the Pressure Equipment Directive (PED) and carries the F mark when so

Certification

This product is available with certification to EN 10204 3.1. Note: All certification/inspection requirements must be stated at the time of order placement.

Pressure/temperature limits

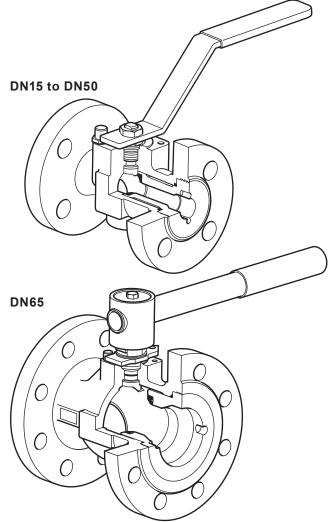

The product must not be used in this region.

Body	design conditions	PN40
PMA	Maximum allowable pressure	40 bar g @ 120 °C
TMA	Maximum allowable temperature	260 °C @ 0 bar g
Minim	um allowable temperature	-29 °C
РМО	Maximum operating pressure for saturated steam service	17.5 bar g
ТМО	Maximum operating temperature	260 °C @ 0 bar g
Minim	um operating temperature	-29 °C

Note: For lower operating temperatures consult Spirax Sarco ΔPMX Maximum differential pressure is limited to the PMO

Designed for a maximum cold hydraulic test pressure of 60 bar g

Sizes and pipe connections

DN15, DN20, DN25, DN32, DN40, DN50, DN65, DN80, DN100 and DN150

Standard flange: EN 1092 PN40 Face-to-face dimensions:

- DN15 to DN100 according to DIN 3202 F4.
- DN25 to DN150 according to BS 2080.

Technical data

Flow characteristic	Modified linear
Port	Reduced bore
Leakage test procedure	to ISO 5208 (Rate A)/EN 12266-1 (Rate A)
Antistatic device	Complies with ISO 7121 and BS 5351

N m	8	8	10	15	20	25	80	70	100	155

Note: The torque figures shown are for a valve that is frequently operated at the maximum operating pressure. Valves that are subject to long static periods, may require a greater break-out torque.

Safety information, installation and maintenance

For full details see the Installation and Maintenance Instructions supplied with the product.

Only the models that have connections designed for welding (SW, BW, Imperial Tube connections) should be welded. Valves with flanged connections must not be welded to avoid damages to the valve and/or injury to personnel.

How to order

Specify	Model	Seat material	F = Carbon and graphite reinforced PTFE - PDR 0.8	F =

Reduced Bore Firesafe API 607 Ball Valve DN25 to DN200 Flanged ASME 150 and ASME 300

Description

The M40Fi is a reduced bore ball valve, with a single piece body, having ISO mounting as standard. It is designed to be an isolating valve, which can be used with the majority of industrial fluids, not a control valve.

In normal working conditions, the ball rests against two PDR 0.8 seats ensuring total closure. When the valve is submitted to temperature above the limits the seats can withstand, the seat becomes deformed and renders to extrusion. When the seats have been totally destroyed, the ball will come to rest firmly against the metal seat in the cap, producing a metal-to-metal closing. This secondary seat in the valve cap ensures the valve will operate to international API 607 standard.

Available types

M40Fi2 ISO	Zinc plated carbon steel body, PDR 0.8 seats.
M40Fi3 ISO	Stainless steel body, PDR 0.8 seats.

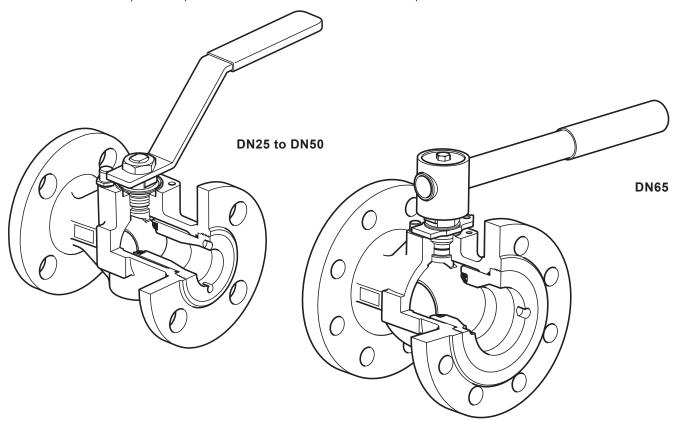

Standards

required.

Certification

This product is available with certification to EN 10204 3.1.

Note: All certification/inspection requirements must be stated at the time of order placement.

Safety information, installation and maintenance

For full details see the Installation and Maintenance Instructions supplied with the product.

Welding

Only the models that have connections designed for welding (SW, BW, Imperial Tube connections) should be welded. Valves with flanged connections must not be welded to avoid damages to the valve and/or injury to personnel.

How to order

Specify	Model Seat material		F = Carbon and graphite reinforced PTFE - PDR 0.8
	Material	Dady material	2 = Zinc plated carbon steel
		Body material	3 = Stainless steel

Example: 1 off Spirax Sarco DN50 M40Fi2 ISO ball valve having flanged ASME 150 connections.

Optional extras:

- Self-venting ball.
- Extended stems to allow full insulation: 50 mm (2") for DN15 to DN50 sizes and 100 mm (4") for DN25 to DN200 sizes.
- Lockable handle.
- 100 mm extended stem with lockable handle.
