

### MC discharge scraper and the tower discharge pumping

#### Applications

- Discharging high-consistency fibrous slurry towers up to 13%
- Up to 20 to 35 % consistency when using diluting scrapers
- Outlet consistency typically 8 to 13%

### SX chemical mixer

#### Applications

Mixing gases, steam or chemicals in-line to

- Fibrous slurries
- Clean and slightly contaminated liquids
- Viscous liquids
- Non-fibrous slurries

### MC discharger

#### Applications

- Dividing and controlling high-consistency fibrous slurry flows discharging high-consistency and fibrous slurry reactors
- Gas removal option
- Chemical mixing
