

Measuring & monitoring systems

Hardware	Introduction
	Energy Meter
	Energy Analyser
	Energy Logger
	Current transformer
	A comprehensive automation portfolio
Software	Energy management software
	A comprehensive software portfolio
Applications	Applications in practice

Appendix	Service and support	
	Index	Index Type / Index Order No. Addresses worldwide

Introduction

Introduction	Industrial IoT with measuring and monitoring systems	A.2
	Total Energy Monitoring	A.4
	Efficient solutions for the energy transition	A.6

Energy Meter

Energy Meter	Introduction BasicLine	B.2
	Selection table	B.6
	Energy Meter - BasicLine	B.8
	Introduction ValueLine	B.14
	Selection table	B.16
	Energy Meter - ValueLine	B.18

Energy Analyser

Energy Analyser	Introduction	C.2
	Selection table	C.4
	Energieanalysegeräte	C.5

Energy Logger

Energy Logger	Introduction	D.2
	Energy Logger	D.3

Current transformer

Current transformer	Introduction	E.2
	Cable-type current transformer	E.4
	Mini current transformer	E.11
	Plug-on current transformer	E.12
	Difference current transformer (Residual Current Monitoring, RCM)	E.16
	Rogowski current transformer system	E.20
	Instrument transformer wiring	E.23

A comprehensive automation portfolio

A comprehensive automation portfolio	Introduction	F.2
	u-remote – I/O Systeme IP20	F.4
	u-control – Controls and edge devices	F.20
	IoT-Gateways	F.28
	u-view – Touch Panels	F.32

Energy management software

Energy management software	Introduction	G.2
	ecoExplorer go – configuration software	G.4
	ResMa® Resource and energy management	G.6
	ResMa® – Basic and ResMa® Package extensions	G.8
	ResMa® Evaluation Kit	G.10
	PROCON-Connect	G.12

A comprehensive software portfolio

A comprehensive software portfolio	PROCON-WEB embedded System	H.2
	PROCON-WEB SCADA	H.6
	Industrial AI	H.10
	ModelBuilder	H.11
	edgeML – Easy and flexible ML integration into automation	H.12
	edgeML Runtime	H.14
	Engineering Software	H.15
	u-link Remote Access Service	H.16

Applications in practice

Applications in practice	Implement your own individual energy management system	I.2
	Intelligent energy management in practice	I.4
	edgeML - Easy and flexible ML integration into automation	I.6
	Modernise large power grids	I.8
	Reliable monitoring of grid quality	I.10
	Reliable residual current measurement	I.12
