

## Hydraulic jacks & tools

A characteristic of this "force-oriented" hydraulic programme is the operating pressure which can be as high as 700 bar. This guarantees a simple and safe generation of highest forces. In spite of this the units remain compact, portable and easy to operate. High-pressure hydraulic systems of this type are used in universal assembly and repair operations whereby their application in day-to-day operations is almost unlimited. The component programme allows the individual configuration of simple and also complex system solutions.

### They are used in the following main industrial areas:

Heavy industry, mining, shipbuilding, offshore, aviation industries, power stations, steel construction, steel making and processing, building construction, bridge and tunnel construction, heavy steel and tank construction, metal processing workshops, and many more.

## INFO

Please note our user instructions at the beginning of each chapter.

## Table of contents

	Page
Hydraulic cylinders, single-acting	334 - 343
	352 - 355
Hydraulic cylinders, double-acting	344 - 351
Accessories for hydraulic cylinders	356 - 359
Hand pumps 700 bar	360 - 365
Hand pumps up to 2000 bar	366
Foot pump 700 bar	367
Electric & Pneumatic motor pumps	368 - 373
Electric hydraulic power packs	374 - 379
Valves & Accessories	380 - 393
Puller	394 - 399
Jacks	400 - 407
Hydraulic jacks & tools	408 - 409
Test rigs	410 - 411
Presses	412 - 414
Selection & Speed charts	415 - 419
